

Live Vehicle & Asset Tracking

View the real-time location of vehicles, driver information and vehicle behavior with Geopointe's Live Vehicle and Asset Tracking. Users can analyze 25+ key data points such as mileage, braking and distance traveled which can be used to automate business processes, increase productivity and save time. Geopointe's integration with Salesforce® enables businesses to utilize Geopointe's user interface and Salesforce reports and dashboards to maintain a consistent pulse on their operations and better analyze their data.

Common Use Cases

- Locate delivery, service, sales or field member(s) near a specific location
- Streamline your dispatch process and optimize service calls by knowing the current location of your team
- Save time by automating tasks such as checking in or out of route stops
- Receive alerts when large equipment is moved off the property or job site
- Manage and track municipal, service, sales and other fleet vehicles
- Identify and report on vehicle behavior, mileage and maintenance requirements
- Easily automate reporting, view daily summaries and set up dashboards in Salesforce to quickly identify critical business information
